

# **Medical Directives**

**(living will)**

**This document is executed while you have a sound mind to direct family members, physicians, or any one else as to what actions should or should not be taken on your behalf when you are unable to communicate due to incapacity or illness.**

**It allows you to decide if in the event of a terminal or irreversible condition and death is imminent whether you want to take all measures possible to sustain your life or be allowed comfort as you gently pass on.**

**For more information visit:** <https://texaslawhelp.org/article/advance-directives>
